ACKNOWLEDGMENTS

I would like to express my gratitude to Professor Joseph Olorunfemi Ojo for the knowledge I gained under his guidance. Most of all, I would like to thank him for giving me the opportunity to pursue a graduate degree.

I would also like to thank Dr. Arunachalam Chandrasekaran for his willingness to be on my advisory committee and for his help in solving a simulation problem. Also thanks to Dr. Charles Hickman for his willingness to be on my advisory committee and for the much appreciated financial support which the Power Center, under his leadership, provided to me.

I would also like to express my sincere appreciation to Mr. L.V. Randolph and Mr. Zhiqing Wu. Their help in the laboratory was invaluable. Also, I would like to thank Professor P. K. Rajan for providing an environment in the ECE Department which is conducive to the attainment of high academic achievement. Thanks also to Anne Neufeldt, Sandy Garrison, Helen Knott, and Pike Green. Last, but not least, I would like to thank Pat Roberts for always remembering my name. That small act of kindness helped me a great deal.

Also, I would like to publicly express my admiration of Dr. Esther Ososanya. She is one of the few people I have ever met who doesn't sacrifice their humanity at the altar of their ambition.

A special thanks to the citizens of Tennessee. Their financial support via their tax dollars allowed me to obtain my graduate and undergraduate degrees.
