

In the classic Content experience, use the **Content** link to access course materials, complete required activities, and monitor your completion progress on topics contained within each course module.

- When you access a course's **Content** tool for the first time, the first page you land on is the **Course Syllabus**, which instructors might use to post the course syllabus and introductory material. You can print and download a course syllabus directly from the **Course Syllabus** page. If your instructor has left the **Course Syllabus** area blank you will not see it listed and you will select the **Table of Contents**.
- Topics you bookmark appear in a list on the **Bookmarks** page. The number beside the Bookmarks link indicates how many bookmarks you have.
- The **Course Schedule** page lists course material due dates, start dates, end dates, overdue course activities, and all events within the course from the **Calendar** tool for the next seven days. The number of overdue items in the course appears in red. Course events are also listed in the **Calendar** tool.
- Only topics with a set due date but no end date or an end date later than the due date appear on this list
